Risk and Reward Profile

1	2	3	4	5	6	7
---	---	---	---	---	---	---

The Fund is categorised as 5 for the purposes of this table. This offers a potential of higher risk than a low risk fund however, with greater long term returns although there is a risk that the value of the fund could fall. It has been so categorised as due to the high volatility of the underlying securities and its benchmark fund.

- Historical data may not be a reliable indication for the future
- The lowest category does not mean 'risk free'.
- Risk category shown is not guaranteed and may shift over time

Investment in the Fund carries with it a degree of risk (which may change over time) which may not adequately be captured by the indicator:

- Market risk - changes in economic conditions can affect adversely the prospects of the Fund;
- FDI Risk – the Fund may trade exchange traded or OTC;
- Counterparty Risk where the Fund trades FDIs;
- FDI use may increase or reduce the risks to underlying assets. As a result of this use, the Fund's NAV is likely to have high volatility;
- Operating risks and the risks relating to the Custodial safekeeping of assets;
- Liquidity and default risk for investment in below investment grade securities.
