### Asset Allocation \*

### Investment Policy \*

Atlante Target Italy is a long-only equity fund that invests at least 80% of its assets in equities with particular focus on Italian and small-mid caps. The net exposure will be between 80% and 100% of the asset allocation. The fund adopts a bottom-up approach focusing on absolute variations combined with a top-down overlay.

### Commentary

The Fund outperformed the benchmark also this month by c. +100bps, mainly thanks to the strong performance registered by some of the top holdings. The main positive contributors to the Fund's performance were Cementir, Intesa Sanpaolo, Autogrill, Leonardo and Cembre. Cementir rose as the CEO confirmed the FY 2017 guidance during the AGM, and the stock also benefitted from the broad-based strong performance registered by the small-mid caps. Intesa bounced strongly following French election as the bank clearly benefitted from a risk-on environment. Autogrill rose as the company announced a corporate reorganization that could lead to some M&A activities in the future. Cembre continued its strong performance sustained by the positive business momentum. The main detractors to the Fund performance during the month were Esprinet and Assicurazioni Generali. Esprinet posted a single-digit decline without any particular reason. Generali underperformed following some negative brokers notes. During the month we continued to reduce the equity exposure given the higher valuations, especially with regard to small-mid caps. In particular we cut our positions in Enav, Biesse, Banca Generali, Unicredit and Intesa, while we marginally increased the stakes in Aeffe and Saes Getters.
