What is this product?

Type

This is an investment fund established as a company with variable capital and segregated liability between sub-funds, incorporated under the laws of Ireland.

Objectives

Investment objective The investment objective of the Fund is to achieve long term capital appreciation.

Investment policies The Fund will seek to achieve its investment objective by investing mainly in bonds issued by commercial, governmental, or supranational entities domiciled in developed countries primarily and in particular in European countries.

At least 70% of the investments of the Fund will be denominated in Euro. The remaining investments of the Fund may be denominated in foreign currencies, mainly USD and JPY, or any other currency that the Investment Manager will consider to be undervalued from time to time.

Investment in bonds may include investment in investment-grade, below investment-grade and un-rated corporate or government bonds, which have a fixed or floating rate. The total Investment in below investment grade and un-rated bonds will not exceed 30% of the Fund's net asset value.

Un-rated bonds are not rated by any rating agency and may have characteristics of either investment grade or below investment grade income securities and bonds.

The Fund may be leveraged as a result of its use of financial derivative instruments, but such leverage will not exceed 100% of NAV at any time.

The Fund may use financial derivative instruments, such as, but not limited to, futures, forwards, foreign exchange contracts (including spot and forward contracts) and options for efficient portfolio management or investment purposes.

Futures (including financial future contracts) may be used to hedge against market risk, to change the Fund's interest rate sensitivity or to gain exposure to an underlying market. Forward contracts may be used to hedge or gain exposure to an increase in the value of assets similar to these describe in investment policies section. Options may be used to hedge or achieve exposure to a particular market instead of using a physical security. Foreign exchange contracts may be used to reduce the risk of adverse market changes in exchange rates or to increase exposure to foreign currencies or to shift exposure to foreign currency fluctuations from one country to another.

For more information about the investment policy, see "Investment Objectives and Policies" in the Fund's supplement

Benchmark The Fund is actively managed in reference to the JP Morgan Bond EMU (the "Benchmark") as its performance is compared to the

Benchmark in marketing materials and the Fund's performance is measured against the Benchmark for the purposes of calculating the performance fee. The benchmark is consistent with the Fund's investment policy. The Investment Manager may use its discretion to invest in companies or sectors not included in the Benchmark in order to take advantage of specific investment opportunities and deviation from the Benchmark may be significant.

Redemption and Dealing Shares in the Fund may be redeemed on demand, subject to certain restrictions, on each Dealing Day.

Distribution Policy The Fund will reinvest any income that it earns from investments.

Launch date The Fund was launched on 01/11/2007. The share class was launched on 01/11/2007.

Fund Currency The base currency of the Fund is EUR.

Switching Investors have the right to switch between share classes and sub-funds of the Company. Please refer to the Fund's Prospectus for more information.

Asset Segregation The Fund is a sub-fund within the Company and the prospectus and financial statements are prepared in respect of the Company as a whole. The assets and liabilities of each other sub-fund and the Fund are segregated by law.

Intended retail investor

This product is intended for investors who plan to stay invested for at least 5 years and are prepared to take on a low level of risk of loss to their original capital in order to get a higher potential return. It is designed to form part of a portfolio of investments.

What are the risks and what could I get in return?

Risks

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

Performance scenarios

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product over the last 10 years. Markets could develop very differently in the future.

The stress scenario shows what you might get back in extreme market circumstances.

Unfavourable: This type of scenario occurred for an investment in the product between March 2015 and March 2020.

Moderate: This type of scenario occurred for an investment in the product between April 2018 and April 2023.

Favourable: This type of scenario occurred for an investment in the product between November 2019 and November 2024.

What happens if Waystone Management Company (IE) Limited is unable to pay out?

The Management Company has no obligation to pay out since the Fund design does not contemplate any such payment being made. You are not covered by any national compensation scheme. To protect you, the assets are held with a separate company, a depositary. Should the Fund default, the depositary would liquidate the investments and distribute the proceeds to the investors. In the worst case, however, you could lose your entire investment.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product. The amounts shown here are illustrations based on an example investment amount and different possible investment periods. We have assumed:

- In the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.
- 10 000 EUR is invested.

We have classified this product as 2 out of 7, which is a low risk class.

This rates the potential losses from future performance at a low level, and poor market conditions are very unlikely to impact the capacity of the Fund to pay you.

Beside the risks included in the risk indicator, other risks may affect the fund performance. Please refer to the fund prospectus, available free of charge at <https://www.albemarleasset.com/>.

Example Investment 10 000 EUR	if you exit after 1 year	if you exit after 5 years (recommended holding period)
Total costs	189 EUR	954 EUR
Annual cost impact*	1.9%	1.9%

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 1.1% before costs and -0.8% after costs.
