What is this product?

Type

This is an investment fund established as an Irish Collective Asset Management Vehicle (ICAV).

Objectives

Investment objective The investment objective of the Fund is to provide long term capital appreciation.

Investment policies The Fund will seek to achieve this by investing primarily in equities and American Depositary Receipts which are listed or traded on recognised markets in the United States. The Fund will have a predominant exposure to US equity markets across all industries and sectors.

The Fund will invest in a selection of equity holdings favoured by a carefully selected group of hedge fund managers. The Fund will generally invest in a diversified portfolio of 40-50 different equity positions from the five-top performing equity allocations selected by 10 hedge fund managers which the investment manager of the Fund has selected. These equity positions must be US listed, publicly traded equities and American Depositary Receipts. The Fund will adjust these positions on a quarterly basis or more frequently depending on cash flows and other public information released on the hedge fund managers' allocations.

The Fund will also hold a cash balance of between 1% and 4% of the portfolio and may be higher or lower than that, depending on cash movements relating to subscriptions, redemptions and market fluctuations.

The Fund may use instruments whose value is determined by changes in the value of the underlying instruments they represent (derivatives) as set out in the Fund's supplement in order to manage the Fund more efficiently (e.g. reducing risks or costs).

For more information about the investment policy, see "Investment Objectives and Policies" in the Fund's supplement.

Benchmark The Fund is actively managed in reference to the S & P 500 Index (the "Benchmark") as its performance is compared to the Benchmark in marketing materials. Investments in the portfolio are not specifically selected from the constituents of the Benchmark, hence the Fund's investment policy is in no way constrained and the degree of deviation from the Benchmark may be significant.

Redemption and Dealing Shares in the Fund may be redeemed on demand, subject to certain restrictions, on each Dealing Day.

Distribution Policy The Fund will reinvest any income that it earns from investments.

Launch date The Fund was launched on 12/04/2016. The share class was launched on 28/04/2016.

Fund Currency The base currency of the Fund is USD.

Switching Investors have the right to switch between share classes and sub-funds of the Company. Please refer to the Fund's Prospectus for more information.

Asset Segregation The Fund is a sub-fund within the ICAV and the Prospectus and financial statements are prepared in respect of the ICAV as a whole. The assets and liabilities of each other sub-fund and the Fund are segregated by law.

Intended retail investor

This product is intended for investors who plan to stay invested for at least 5 years and are prepared to take on a medium-high level of risk of loss to their original capital in order to get a higher potential return. It is designed to form part of a portfolio of investments.

Term

The Fund is open-ended and has no maturity date. Subject to the liquidation, dissolution and termination rights of the board of the Fund as set forth in the Fund prospectus, the Fund cannot be automatically terminated. The PRIIP manufacturer, Waystone Management Company (IE) Limited, is not entitled to terminate the product unilaterally.

Practical information

Depository The Fund's assets are held with its depository Northern Trust Fiduciary Services (Ireland) Limited.

What are the risks and what could I get in return?

Risks

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 5 out of 7, which is a medium-high risk class.

This rates the potential losses from future performance at a medium-high level, and poor market conditions will likely impact the capacity of the Fund to pay you.

Be aware of currency risk. You will receive payments in a different currency, so the final return you will get depends on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

Beside the risks included in the risk indicator, other risks may affect the fund performance. Please refer to the fund prospectus, available free of charge at <https://www.optima.com/>.

Performance scenarios

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product and a suitable proxy over the last 10 years. Markets could develop very differently in the future.

The stress scenario shows what you might get back in extreme market circumstances.

Unfavourable: This type of scenario occurred for an investment in the product between August 2021 and October 2023.

Moderate: This type of scenario occurred for an investment in the product between April 2017 and April 2022.

Favourable: This type of scenario occurred for an investment in the product between June 2016 and June 2021.

What happens if Waystone Management Company (IE) Limited is unable to pay out?

The Management Company has no obligation to pay out since the Fund design does not contemplate any such payment being made. You are not covered by any national compensation scheme. To protect you, the assets are held with a separate company, a depository. Should the Fund default, the depository would liquidate the investments and distribute the proceeds to the investors. In the worst case, however, you could lose your entire investment.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product. The amounts shown here are illustrations based on an example investment amount and different possible investment periods. We have assumed:

- In the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.
- 10 000 USD is invested.

Example Investment 10 000 USD	if you exit after 1 year	if you exit after 5 years (recommended holding period)
Total costs	256 USD	1 964 USD
Annual cost impact*	2.6%	2.8%

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 10.4% before costs and 7.6% after costs.
